DIVALI WALL LIGHTS

NAMES

Our lights have been named after Deserts of the world – which many people find easier to remember than codes.

CODES

Made up of the following

M = Resin based shade

(Number eg. 2) = every shape of shade has a different number

A, B etc A = plain (no design in the front of the shade)

all our shades with smooth finish are plain

B = design (look for description)

C = design (look for description)

N = for INTERIOR use

X = for EXTERIOR use

eg. M-2A-N – This is a resin based wall light shade, number 2 shape, plain and can be used Interior

MATERIAL

The shades are made from resin mixed with fillers and pigments

The walls of the shade are about 10mm thick

Colour: White

You can paint the "Textured Range" with PVA and the "Smooth Range" with PVA but only after applying a key to bond the paint to the surface.

Attachment devices are 3CR12 and Galvanized coach screws are supplied with wall plugs

LAMP HOLDERS

are optional and are **priced separately** (most shops supply their own bulkheads but buy our interior lamp holders).

See list on page 4 of catalogue of lamp holder options.

On the far right column next to each shade is a list of the lamp holders that can be bought with that particular shade

Globes are not included.

PACKAGING:

wrapped in bubblewrap and packed one per box which is lined on 6 sides with polystyrene.

We guarantee that our products arrive intact and we will replace any shade immediately that has been broken in transit,

however we must be informed in writing of this within 24 hours of delivery of the product.
